EDUCATION

Brigham Young University

Statistics MS; Minor in Mathematics

SKILLS AND ACHIEVEMENTS

- **Programs (Most to Least Proficient):** R (Tidyverse), SQL (Snowflake, SSMS), Excel, SAS, Python (Scikit-Learn, TensorFlow), LaTeX, Power BI, Tableau, React, CSS,
- GRE Math Score: 168/170
- Data science processes, multivariate analysis, machine/deep learning, Bayesian methods, Monte Carlo simulation, statistical probability and inference, anomaly detection methods ([with authored R package](#))
- BYU Statistics Association President 2023-2024, MS Statistics Program Top Research Contributor Award 2025, Won BYU Statistics Association 2023 case study, won best presentation in 2025 Student Research Conference

EXPERIENCE

Data Coordinating Center, University of Utah Health

Biostatistician I

May 2026-Present
Salt Lake City, Utah

- TBD

Department of Statistics, BYU

Graduate Research Assistant II

May 2022-April 2026
Provo, Utah

- Co-authored and contributed to various publications, such as [glucose intake on cognition](#) and [youth athlete training](#)
- Cross-validated unique ML methods for increasing accuracy in knee movement model recorded from device
- Applied parametric and non-parametric models, statistical tests, and visualized insights over 8 research projects
- Designed [new outlier detection](#) and [missing value imputation algorithms](#) for MS degree research, presenter at national conference (JSM) in 2025; yield equivalent or better F1 scores at 90% reduced computation time to leading method
- Presented research projects in conferences across 4 years (session winner in 2025 against 6 peers)
- Feature engineering, ANOVA, mixed models, MANOVA, pairwise comparisons, experiment design and power analysis (sample sizing), PCA, LDA, regression (WLR, OLR, splines, CP, LASSO/ridge, etc.), BART, random forests

Bridgecrest

Servicing Data Analyst Intern

May 2025-August 2025
Tempe, Arizona

- Designed Snowflake queries to pull and monitor data from 3000+ delinquent clients at risk for vehicle repossession
- Developed controlled trial experiment to evaluate changes in customer behavior with new SMS outreach strategy
- Presented slide decks to Directors of Analytics on strategy, I=E, pilot performance, and product implementation
- Navigated causal findings using Freq/Bayes A/B, regression, survival models, XGBoost + SHAP in R/Excel
- Forecasted ~\$370k in gained cash flow per year from delinquent accounts from strategy implementation

Swire Coca-Cola

Category Market Insights Intern

April 2024-August 2024
Draper, Utah

- Developed back and front-end of Power BI dashboards for shelf design team, visualizing YoY shelf changes in stores
- Hosted live training of Power BI software to team of 12+, demonstrating navigational tools to efficiently pull insights
- Presented ETL pipeline, front-end visual, and anticipated outcomes from project to 60+ peers and 5+ stakeholders
- Extracted data sources from Snowflake, SharePoint, Excel; ingested to back-end for Power Query transformation
- Scribed 40+ DAX calculations to display various metrics, such as market share, store presence, and product coverage

UtahStats Instagram

Statistical Researcher

April 2024-August 2024
Remote

- Compiled 40-page for-profit exploratory analysis report from survey data from 3,000+ college students from BYU and UVU. Sold ~15 copies of this report (now distributed for free for 10,000+ followers).
- Designed 50+ tables and figures for applied analysis and general audience instruction on young adult trends including college choice, grades, culture, dating, and other topics.

- Performed 50+ various tests from goodness-of-fit, GLMs, Monte Carlo simulations, and other methods to showcase statistical significance and trends.

BYU Statistics Association

May 2022-April 2024

President

Provo, Utah

- Co-founder of the first general statistics club for BYU Statistics department
- Transitioned all club volunteer roles into part-time paid positions during presidential term
- Increased membership by 50% over 2023-2024 year (grown to 250+ students) through frequent marketing and events
- Organized 40+ club activities and programs to improve skills, share knowledge, and foster student camaraderie

Missionary Training Center

May 2023-June 2023

Research and Evaluation Intern

Provo, Utah

- Performed open-analysis survey results of 50,000+ respondents to share discoveries on missionary trainee experiences
- Presented results to R&E director on experience differences of foreign language assignments and longevity of training
- Developed ML model to auto-classify survey responses into categories based on NLP features (tokenization, TF-IDF, text prevalence, etc.)

Department of Statistics, BYU

January 2022-April 2026

Teaching and Consulting Assistant

Provo, Utah

- Instructed 100+ students for 5 professors across classes instructing intro statistics, Tableau, applied research methods, applied research projects, and multivariate statistics methods courses through labs, office hours, and grading
- Consulted on three cross-discipline projects on student financial stress, [LASSO model diagnostics analyzing blood pressure in regression settings](#), and [learning outcomes for adults under VR environments](#)
- Modified SAS scripts for students who struggled with unfamiliar language and coding syntax and improve efficiency for grading homework assignments

Church of Jesus Christ of Latter-day Saints

June 2019-June 2021,

Missionary and Mission Leader

Bismarck, North Dakota

- Instructed 200+ volunteers across five states in effective methods for networking, contacting, and teaching methods
- Counseled with mission president to evaluate and improve zone-by-zone performance
- Evaluated area proficiency, identified patterns, and provided recommendations to improve time management, record keeping, and goal tracking across organization through mobile application
